SUMMARY

A passionate learner and creative problem-solver, eager to expand skills in software engineering. An organised individual who can work independently and in teams, as well as communicate, meet deadlines, and complete work that meets high expectations.

WORK HISTORY

Ten4 Design Web Developer Placement Year

09/2021 - 02/2022

- Adapted to the company's development framework in order to develop, maintain, and collaborate on numerous projects
- Responsible for the full build of [Stiff and Trevillion](#) and [Bates Alarms](#) websites
- Developed user interfaces and events using HTML, SCSS, and Javascript
- Designed and maintained databases using Craft Content Management System
- Responsible for the interaction between front-end and back-end using Twig
- Working with Figma files when developing websites
- Testing of applications including SEO and performance checks
- Used Tower Git for organisation and collaboration
- Worked closely with directors and project managers to build client websites

QMUL Buddy Scheme Mentor 09/2022 - present

- Help students transition into their first year of university and give support throughout
- Organise meetups to encourage a welcoming environment
